46) Define the term "property rights." Explain why the lack of well defined and enforceable property rights is detrimental to the smooth functioning of a market system.
Answer: The term "property rights" refers to the rights that individuals or firms have to the exclusive use of their resources, within the confines of the law. Well defined and enforceable property rights provide the incentive for people and firms to invest resources and undertake risks. This encourages the production of a wide range of goods and services. Without property rights and the means to enforce these rights, no person would want to undertake such a risk.

47) Why are music, television, and movie companies concerned about their products being posted to Internet websites such as YouTube?
Answer: These companies believe that their intellectual property rights are being violated when the unauthorized use of their material appears on these websites, and this reduces their ability to sell CDs and DVDs of this material.

48) Adam Smith, the father of modern economics wrote in his book, An Inquiry into the Nature and Causes of the Wealth of Nations, "It is not from the benevolence of the butcher, the brewer, or the baker, that we expect our dinner but from their regard to their own interest." Explain what he meant by that statement and how such behavior promotes the wealth of a nation.
Answer: The statements refer to the fact that people act in their own self interest. For example, the butcher who sells meat and the baker who bakes bread carry out these activities because these tasks contributed to their livelihood, not because they were concerned about the diner. Nevertheless, their actions benefited the diner. This is precisely one of the virtues of a market: people do not have to act virtuously to produce worthwhile outcomes. Producing goods and services that consumers value increases the wealth of a nation.
